EMPLOYMENT -----

Perl Developer II, cPanel (2016-11 - Present)

Mid-level software developer for internal systems.

- Full lifecycle development of in-house software for billing, licensing, customer portal, and APIs, supporting cPanel's 900+ enterprise partner accounts.
- Successfully resurrected, rewrote, and reintroduced the departmental linter for the internal development teams workflow. Current maintainer.

Quality Assurance Analyst, cPanel (2014-11 - 2016-11)

Bug finder and advocate for quality in an agile (scrum) environment.

- Wrote, ran, and maintained automated tests and test plans for team responsible features in enterprise level software (cPanel/WHM).

Technical Analyst II / Migration Specialist, cPanel (2014-11 - 2012-04)

Technical support and migrations for enterprise partner's cPanel servers.

- Successfully planned and migrated hundreds of hosting servers from other control panels to cPanel/WHM.
- Wrote and maintained departmental scripts to assist in troubleshooting common issues.
- Contributed to internal documentation and troubleshooting guides to aid other technicians.

Technical Product Specialist, cPanel (2011-04 - 2012-04)

Technical sales, training, enterprise partner customer relationships, and representing cPanel at conferences in the US and abroad.

Web Developer, Render Orange, LLC (2009-11 - 2013-10)

Owned and operated, full service web development company.

- Grew part-time client development and hosting work during college into a steady full-time customer base.
- Formed and maintained relationships with other contract designers and marketing professionals for projects.

IT Support Technician, VGM Forbin (2009-02 - 2009-11)

IT support and generalist for Forbin employees and customers.

- Migrated over 500 hosting accounts from on premise BIND servers to Godaddy's DNS service.

Server Support Engineer I, FastServers, Inc (2008-01 - 2009-02)

First tier managed datacenter server support. Server installation and configuration, racking, reboots, emergency tickets, and monitoring.

- Learned how to work in a stressful and demanding environment.

Computer Lab Assistant / Tech Services Intern, North Iowa Area Community College (2005-08 - 2007-12)

Campus computer lab technician in training. Assembly, disassembly, setup, and disposal of campus computers.

- Moved, installed, imaged, and configured a new lab of around 30 computers and monitors.

- Starting as work study during the semester, moved into a stipend position then paid internship with the Tech Services department.

EDUCATION -----

North Iowa Area Community College (2005-08 – 2007-12)

Focus of study on system administration, networking, and project management.
